# COMPACT DOSING SYSTEM

Are you looking for a reliable partner to evaporate your emissions? Choose Albonair as a proven, innovative and reliable partner to take your engines and vehicles to the next level – no compromises!

We care about your emissions and deliver best in class performance to cover all global emission standards - now and in the future!

## ALL APPLICATIONS

- Heavy duty trucks
- Medium duty trucks
- Buses
- Construction vehicles
- Agricultural machines
- Stationary
- Marine

## COST-EFFECTIVE

- Compact design
- Easy integration
- Less components
- Durable – long lifetime
- Service free
- Best in class dosing accuracy
- No compressed air required

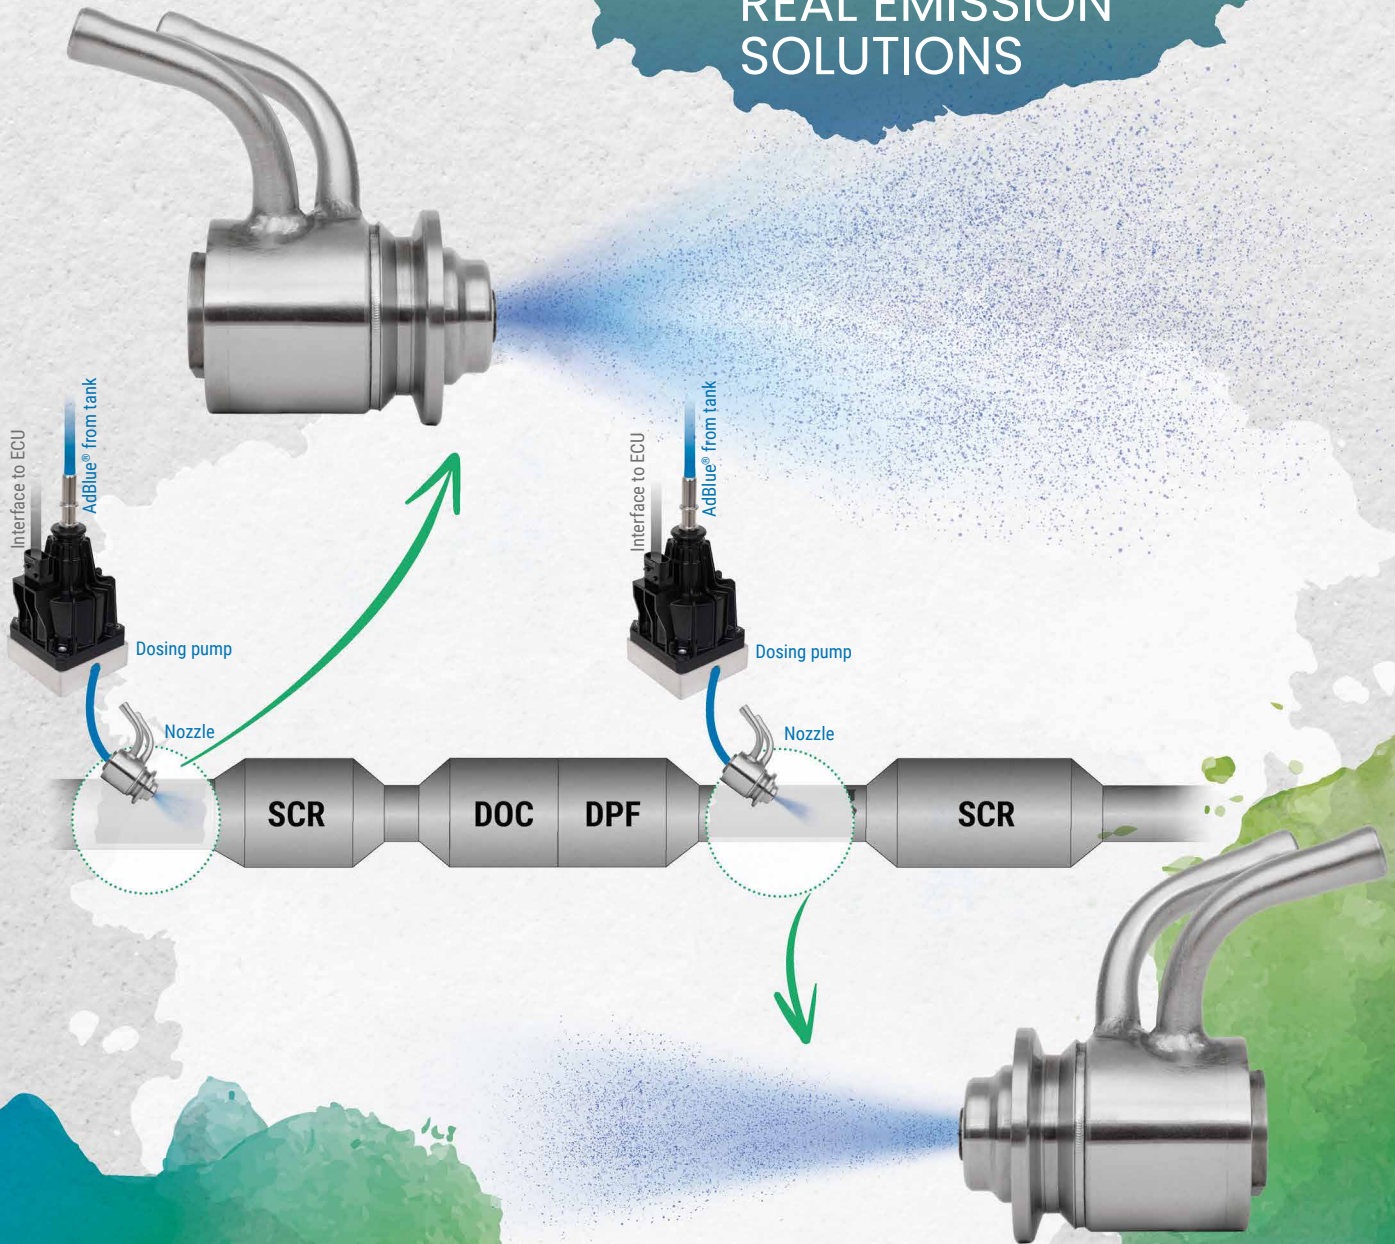

## INDIVIDUAL & ROBUST DESIGN

- Modular & versatile design
- Fits to all mixers and EATS systems
- Easy adoptable to specific requirements
- Matches also given interfaces
- Plug & play control (OBD incl.)
- Single & dual dosing
- Pure mechanical nozzle

**WE CAN  
DO IT  
AND  
WE CARE**

# REAL EMISSION SOLUTIONS

We match all interfaces and offer individual solutions to evaporate your emissions. We cover spray requirements from a single doser to a dual stage SCR system to allow you an efficient and compact aftertreatment design.

Albonair's mission is to make air cleaner – with innovative exhaust aftertreatment systems made in Germany. The company has specialized in the development and manufacturing of urea dosing as well as heating and heat retention systems for lowest NO<sub>x</sub> emissions.

As a volume producer with more than 2 million systems in the market, Albonair is an established and proven original equipment manufacturer worldwide.

Albonair has in addition to its headquarters in Dortmund further locations in Chennai (India) and Shanghai (China).
